

# **GUNITE 7000**

16 Greenmeadow Dr., Suite 202 | Timonium, MD 21093 410.561.8770 | www.uscproducts.com MICRO SILICA MODIFIED SHOTCRETE

### **TECHNICAL DATA**

**DESCRIPTION:** Gunite 7000 micro silica modified shotcrete mortar is a single component, micro silica shotcrete available in both Wet (7000w) or Dry Formulations (7000d). Gunite 7000 features micro silica for added density, tensile and flexural strength. Gunite 7000 has excellent durability and is resistant to freeze thaw cycling. Easy to use, Gunite 7000 requires only the addition of potable water at the job.

**USE FOR:** Bridges and roadways, tunnels and piers, manhole and sewer repairs, elevated concrete slabs, parking decks, piers and bulkheads

#### ADVANTAGES: • Available in either Wet Process (7000w) or Dry Process Formulations (7000d)

- High compressive, tensile, flexural and bond strengths
- Low permeability
- High build
- Low rebound and dust
- Use on vertical or overhead repairs
- Excellent finishing characteristics

### **TECHNICAL DATA**

- APPLICATION: Add potable water to **Gunite 7000** at a maximum rate of 10% water (123 fluid ounces per 80 lb bag) by weight to **Gunite 7000**. Use normal dry process shotcrete methods. Pre-dampen surface to a surface saturated, dry condition with clean water for good bond. No special curing is required. Always follow practices of ACI 506-R85: Guide to Shotcrete for application and curing methods. For detail application instructions refer to US Concrete Guide Specification Guide.7001.
- **LIMITATIONS: Gunite 7000** should be used when ambient temperatures are at 40°F (4°C) and rising. Lower temperatures produce a slower set; higher temperatures produce a faster set. For temperatures below 40°F (4°C) consult with the manufacturer for special cold weather placement provisions which include but are not limited to conditioning of the materials, use of heated mix water and thermal protection. In hot weather use chilled water for mixing.
- **PACKAGING: Gunite 7000** is packaged in 50 lb, 80 lb or 3000 lb bags. Each 80 lb bag yields approximately .63 ft<sup>3</sup> when mixed with water.

CAUTION: WARNING! CONTAINS FREE SILICA & PORTLAND CEMENT. DO NOT BREATHE DUST. May cause delayed lung injury (silicosis). Follow OSHA safety and health standards for crystalline silica (quartz). Cement powder or freshly mixed concrete grout or mortar may cause skin injury. Avoid contact with skin and wash exposed skin areas promptly with water. If any cement powder or mixture gets into the eyes, rinse immediately and repeatedly with water and get prompt medical attention.
